Abstract

Your abstract should give readers a brief summary of your article. It should concisely describe the contents of your article, and include key terms. It should be informative, accessible and not only indicate the general scope of the article but also state the main results obtained and conclusions drawn. The abstract should be complete in itself; it should not contain undefined abbreviations and no table numbers, figure numbers, references or equations should be referred to. It should not normally be more than 300 words.

keywords: XXX

1 Introduction

Define the problem that you want to solve.

1.1 Applications

Why this problem is important and what are the applications.

1.2 Literature review

Review at least 3 (for SIE 449) and 5 (SIE 549) references.

2 Methodology/Algorithm description

Describe the algorithms and state their convergence results.

3 Conclusion and Future Direction

Summarize the results and state the gap(s) and possible future directions.
